

## Toddler Community 2-3 years

### **Help me to help myself !**

Through the different Montessori activities your child will be encouraged to do things by themselves, to grow in confidence and ability in their practical skills, to learn to take care of themselves and the environment around them, and to develop their communication and language skills in both English and French. We focus on the development of movement, language, and independence, but also on building a sense of community where everyone is important and respected. Montessori toddlers learn the rules of grace and courtesy, to treat each other with compassion and to resolve conflicts peacefully.

The class room is thoughtfully designed to facilitate a toddler's functional independence and to give her the freedom to move and is set up with all the materials according to the standards of the Association Montessori Internationale (AMI).

When toddlers are independently toileting, able to complete a full cycle of work, communicating well, and are socially ready, they transition into the primary classroom around age 3. Our nurturing community of trained teachers for children aged 2 to 6 years old is committed to helping your child learn the skills that will help him thrive now and in the future.
